

• BETTA HORN TABLE LAMP
FROM INTERLUDE HOME:

"The smooth beauty of natural horn, with all of its native color variations, mixes well with fur and chunky wools."

SWISS CHEESE MIRROR BY STUDIO A:

"Another example of pattern and texture, this organic-feeling sculpture serves as a focal point over the fireplace."

OTTOMAN: Kasprowicz designed the casual round cowhide ottoman herself.

DRIFTWOOD NESTING TABLES BY PALECEK: "These tables work perfectly in this space."

LANTERNS BY ROOST: "Large Teahouse lanterns (not shown) cast a warm glow, especially come autumn."

SHEEPSKIN RUGS FROM AUSKIN: "Authentic sheepskin rugs provide soft accents."

MASCULINE INSPIRATION:

"When men are involved in the process of design, they often mention nature, history, and such," Kasprowicz says. For the family room shown here, she drew inspiration from just that, as well as objects brought from distant travels. "The color palette is a full spectrum of warm, neutral tones, with particular play between taupe browns and grays. In addition, I am passionate about mixing textures (like the warm luster of a shell), for a rich display of organic materials."

• HOLLOWAY TEAK AND CRACKED RESIN POOF FROM INTERLUDE HOME:

"An extraordinary side table! The beautiful organic pattern in natural teak artfully combines browns and grays."

• SHEEPSKIN PILLOW FROM ARHAUS:

"I'm crazy about eye-catching natural texture. Sheepskin's an irresistibly soft feeling on the skin. Luxurious leisure!"

• TILE-COVERED SHELF:

Kasprowicz designed an inventive shelf (not shown in room above, but detail shown here) herself. "I flipped an Ikea shelf horizontally and covered it with mosaic-tile and sheepskin pillows and rugs, storied driftwood, and more."

"Add some intrigue!" says Kasprowicz.

• AMINA TRAYS IN COOL GRAY BY MADE GOODS:

"Another rich texture. The cool neutral gray and wood trim serve as a nice, sturdy resting place for cocktail-hour accessories."

• ATELIER SCISSOR TASK FLOOR LAMP FROM RESTORATION HARDWARE:

"This was inspired by pharmacy lamps of the early 1900s. I relish the details in the geometric construction and the extension arm joints."
